ABSTRACT

The "Heart to Heart" mobile app addresses the growing importance of student mental health by providing a platform for open communication, counselor support, and issue resolution without fear of stigma. Designed to create a caring school environment, the app offers features such as complaint filing, appointment booking, and access to counseling tools, thereby improving students' overall well-being and academic performance. Developed using Agile methodology with Scrum-based development and UX design principles, the app ensures flexibility, regular updates, and user-friendly navigation tailored to students' needs. Preliminary findings suggest students value practical tools that simplify access to support, making "Heart to Heart" a forward-thinking solution that empowers students and motivates educational institutions to prioritize mental health.

INTRODUCTION

Addressing the Need for Mental Health Support

- Student mental health is a growing global concern due to academic pressures, social expectations, and personal challenges.
- Barriers to seeking help include stigma, lack of awareness, and fear of judgment.
- Traditional systems face issues like limited accessibility, insufficient staff, and complex navigation.
- Mobile apps provide a secure, private, and stigma-free platform for support.

AIM AND OBJECTIVES

Aim

The project aim to advance knowledge in mobile application development for mental health, especially in user-centered design and secure communication protocols

Objectives

1. To explore and analyze the current challenges students face in accessing mental health support within educational institutions and identify the strengths and weaknesses of existing solutions.
2. To design and develop a mobile app that serves as a one-stop solution for students' mental health needs, integrating features for complaint filing, appointment scheduling, and resource access in a confidential, user-friendly manner.
3. To evaluate and optimize the app's effectiveness in terms of usability and student satisfaction, incorporating feedback to refine and improve the overall user experience

PROBLEM STATEMENT

Students today face increasing mental health challenges due to academic pressures, social expectations, and personal struggles. However, many are reluctant to seek help due to stigma, lack of awareness, and fear of judgment. Traditional mental health support systems, such as on-campus counseling services, face significant limitations, including:

Limited accessibility and availability of staff.

Fragmented and difficult-to-navigate resources.

The stigma surrounding mental health, discouraging students from seeking support.

SCOPE

Key Features:

- Complaint filing for students to voice concerns easily.
- Appointment scheduling with counselors for seamless support.
- Access to mental health resources, including guides and stress management tools.

Target Audience:

- Designed specifically for students in educational institutions.

Technological Focus:

- Agile development methodology for iterative improvements.
- User-centric design to ensure accessibility and ease of navigation.

Overall Goal:

- To create a centralized, judgment-free platform that empowers students and promotes mental well-being, ultimately fostering a supportive educational environment.

FINDINGS

Positive User Feedback:

- Most users found the app easy to navigate and user-friendly.
- High satisfaction with features like complaint filing, appointment booking, and counseling tools.

Preferred Features:

- Mental Health Check-In and Appointment Scheduling were the most valued functionalities.
- Users appreciated the centralized platform for accessing mental health resources.

Challenges Identified:

- Minor navigation issues reported by a small group of users.
 - Suggestions for improvements, such as enhanced reminders and streamlined authentication processes.
- 

METHODOLOGY

AGILE METODOLOGY

Agile model for structured development.

AGILE MODEL PHASES

1. Plan
2. Design
3. Develop
4. Test
5. Deploy
6. Review

CONCLUSION

- The "Heart to Heart" app provides a centralized, stigma-free platform for student mental health support.
- It simplifies access to resources through complaint filing, appointment scheduling, and counseling tools.
- Developed using Agile methodology, it evolves based on user feedback.
- The app empowers students and fosters a culture of well-being in educational institutions.

THANK
YOU
